Brighthouse SecureKey Fixed Indexed Annuities offer 100% protection<sup>1</sup> for your purchase payment against market downturns. SecureKey is designed to provide growth opportunities and safety from market loss. One version of this product is available (5-year) and is made up of 1-year index terms. At the end of each index term, the performance of your index is used along with the crediting strategy you chose to determine the amount of interest credited, if any, to your contract.

The rate associated with your crediting strategy is guaranteed for the length of each index term, and new rates will be declared for each subsequent index term. The rates shown below are the new contract rates for the initial 1-year index term for your contract. Allocations to an Indexed Account are not invested directly in an index. Instead, Brighthouse SecureKey Fixed Indexed Annuities track the performance of well-known market indices: S&P 500<sup>®</sup> Index, Russell 2000<sup>®</sup> Index, MSCI EAFE Index, and S&P 500<sup>®</sup> Low Volatility Price Return Daily Risk Control 5% Index (referred to below as "S&P 500 LV DPR 5%").<sup>A,B,C</sup> Interest is credited at the end of the 1-year index term. Rate changes are indicated in **bold italics**.
