## Access to Your Money<sup>3</sup>

### Free Withdrawal Amount

The following amounts may be withdrawn free of withdrawal charge and MVA:

- First contract year: 10% of the purchase payment
- Each year after the first contract year: 10% of the account value, as of the prior contract anniversary
- Withdrawals made to satisfy required minimum distributions (RMDs) for amounts held within the contract

### Minimum Withdrawal Value

Upon full surrender, payment of death benefit, or annuitization, the amount you receive will never be less than the minimum withdrawal value. As specified in your contract, the minimum withdrawal value is a percentage<sup>4</sup> of your purchase payment accumulated at the Minimum Withdrawal Interest Rate, adjusted for withdrawals and any premium tax or other taxes.

### Limited MVA

During the initial guarantee period, if a withdrawal is made that exceeds the Free Withdrawal Amount, a Market Value Adjustment (MVA) may apply in addition to withdrawal charges. The adjustment to your withdrawal value could be positive or negative, based on current interest rates, relative to interest rates at issue. However, if you don't plan on taking withdrawals during the initial guarantee period, you can take advantage of a higher Initial Guaranteed Interest Rate without being impacted by the MVA.

In general, if market interest rates, based on the applicable Constant Maturity Treasury (CMT) rate, are higher than they were on the date you purchased your contract, your withdrawal value will be lower. If market interest rates (CMT rate) are currently lower than they were when you purchased your contract, your withdrawal value will be higher. Additionally, the amount of time remaining in the initial guarantee period can also be a factor in the adjustment to the withdrawal value. So, assuming the same change in interest rates, the more time that is left in the initial guaranteed period when a withdrawal is made, the larger the adjustment would be. Please note that the withdrawal value will never be lower than the minimum withdrawal value attributable to each withdrawal outlined in your contract.

### Interest Income Program

- **Withdrawal Amount** – Equal to the interest credited during the previous contract month
- **Frequency** – Monthly
- **Availability** – This program may be elected at any time at no additional charge

These withdrawals will not be subject to withdrawal charges or an MVA as long as they do not exceed the Free Withdrawal Amount discussed above. This program may be stopped and restarted at any time. Withdrawals reduce the account value and the value of the death benefit.

### Guaranteed Income

- Fixed Life Annuity with 10-Year Guarantee Period
- Fixed Joint and Last Survivor Annuity with 10-Year Guarantee Period
- Any other payout option that may be available at that time

Income payments can start 13 months after the issue date and must start by the maturity date, which is the contract anniversary after the owner's 95th birthday.

### Waivers of Charges

Withdrawal charges and MVA will be waived under certain limited conditions:

- **Nursing Home Waiver** – If you become confined to a nursing home and/or hospital for 90 consecutive days or more; must be 80 years old or younger at contract issue
- **Terminal Illness Waiver** – If you are diagnosed with a terminal illness with a life expectancy of 12 months or less; must be 80 years old or younger at contract issue
- **Required Minimum Distribution (RMD)** – Calculated payments for the contract may be withdrawn without a withdrawal charge

Other restrictions and conditions apply. These waivers may not be available in all states. See the contract or your financial professional for more details.

## Protection

### Death Benefit

Upon the death of the owner, the beneficiary will receive the full account value (not subject to withdrawal charges or MVA) or the minimum withdrawal value, whichever is greater.

- <sup>1</sup> If the client is buying an annuity to fund a qualified retirement plan or IRA, they should do so for the annuity's features and benefits other than tax deferral. Tax deferral is generally a feature of a qualified retirement plan or IRA, so an annuity would not provide an additional tax deferral benefit. References throughout this material to tax advantages, such as tax deferral and tax-free transfers, are subject to this consideration. The product described in this material is not made available to employer-sponsored qualified retirement plans. For non-qualified annuities, tax deferral is not available to corporations and certain other entities.
- <sup>2</sup> The Enhanced Interest Rate may not be available if the new contract rates for a purchase payment of \$25,000 – \$99,999 are equal to the contractual MGIR.
- <sup>3</sup> Withdrawals of taxable amounts are subject to ordinary income tax. Withdrawals made before age 59½ may also be subject to a 10% federal income tax penalty. Distributions of taxable amounts from a non-qualified annuity may also be subject to the 3.8% Net Investment Income Tax that is generally imposed on interest, dividends, and annuity income if the modified adjusted gross income exceeds the applicable threshold amount. Withdrawals will reduce the death benefit and account value. Withdrawals may be subject to withdrawal charges.
- <sup>4</sup> Percentage will differ for contracts issued in New York.
