## SSGA ETF asset allocation\* options within your Brighthouse Financial variable product

You may invest in two State Street Global Advisors ("State Street") managed portfolios through Brighthouse Financial® variable products.\*\* Brighthouse Investment Advisers, LLC is the adviser to the portfolios and SSGA Funds Management, Inc. is the subadviser.

### State Street utilizes a three-step process to create each portfolio

- 1. Evaluation** – The investment decision-making process starts by determining the relative attractiveness of stocks, bonds, and cash. The process includes both a top-down macroeconomic overview and bottom-up quantitative analysis to develop expected returns for asset classes.
- 2. Construction** – A rigorous screening process is layered over each asset class once the target mix of stocks, bonds, and cash is determined. State Street uses a quantitative optimization and fundamental review to build the portfolios. Because of the tactical nature of these portfolios, the fundamentals and weights are reviewed on a regular basis. The portfolios can be adjusted to take advantage of market opportunities.
- 3. Implementation** – State Street's portfolio managers choose from among hundreds of ETFs, attempting to select the most effective way to achieve exposure to global markets.

## THE SSGA ETF ASSET ALLOCATION PORTFOLIOS HOLD UNDERLYING ETFs WHICH MAY:

Invest in stocks of small capitalization or mid capitalization companies. Such stocks may fluctuate in value more than stocks of large capitalization companies, and may perform poorly due to the issuers' limited product lines, markets, financial resources, or management experience.

Invest in securities of foreign companies and governments, which involves risks not typically associated with U.S. investments, including changes in currency exchange rates; economic, political, and social conditions in foreign countries; and governmental regulations and accounting standards different from those in the U.S.

Invest in high-yield or "junk" bonds, which are issued by companies that pose a greater risk of not paying the interest, dividends, or principal their bonds have promised to pay. Such bonds are especially subject to adverse changes in interest rates or other general market conditions, or to downturns in the issuers' companies or industries.

Invest in Real Estate Investment Trusts (REITs), which attempt to profit from the rental and sale of real property or from real estate mortgages. REITs may suffer from declines in real estate values or changes in interest rates.

Invest in securities of technology companies, which may be subject to abrupt or erratic price changes due to rapid technological developments and intense industry competition. Such emphasis on investments in a single sector will make a portfolio more likely to fluctuate in value due to events affecting that sector.

### MORE ABOUT THE SSGA ETF ASSET ALLOCATION PORTFOLIOS:

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Allocation portfolios are "fund-of-funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses, which includes the cost of the asset allocation services it provides, as well as its pro rata share of the management fee and expenses of each underlying portfolio. Without these asset allocation services, the contract owner's expenses would be lower. Diversification does not ensure a profit or protect against loss.

Exchange Traded Funds (ETF) purchases and sales are made on the open market and as such are subject to ordinary commission charges by the Broker/Dealer firm who executes the transaction. Trading throughout the day, the value of an ETF may be more or less than the net asset value of the underlying holdings. Additionally, the spread between the bid and ask prices will cause the price at which you can immediately sell an ETF share you just purchased to be lower than the price you paid for it. There is no guarantee that an ETF will meet the objectives of its underlying portfolio.

Market indices referenced are unmanaged and representative of large and small domestic and international stocks and bonds, each

with unique risks. Information about them is provided to illustrate market trends and does not represent the performance of any specific investment. Investors cannot invest directly in an index.

*Variable life and annuity products are offered by prospectus only. Prospectuses for variable products issued by a Brighthouse Financial insurance company, and for the investment portfolios offered thereunder, are available from your financial professional. The contract prospectus contains information about the contract's features, risks, charges, and expenses. Investors should consider the investment objectives, risks, charges, and expenses of the investment company carefully before investing. The investment objectives, risks, and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Please read the prospectuses and consider this information carefully before investing. Product availability and features vary by state. Please refer to the contract prospectus for more complete details regarding living and death benefits.*

**Variable annuities are long-term investments designed for retirement purposes. Brighthouse Financial variable life insurance and annuity products have limitations, exclusions, charges, termination provisions, and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet their stated goals or objectives. The account or cash value is subject to market fluctuations and investment risks so that, when withdrawn, it may be worth more or less than its original value. All contract and rider guarantees, including optional benefits and any fixed account crediting rates or annuity payout rates, are backed by the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.**

Variable annuity withdrawals of taxable amounts are subject to ordinary income tax. Withdrawals made before age 59½ may be subject to a 10% federal income tax penalty. Distributions of taxable amounts from a non-qualified annuity may also be subject to the 3.8% Unearned Income Medicare Contribution tax that is generally imposed on interest, dividends, and annuity income if your modified adjusted gross income exceeds the applicable threshold amount. Withdrawals will reduce the living and death benefits and account value. Withdrawals may be subject to withdrawal charges. Variable life insurance withdrawals may have an adverse effect on the policy's cash value and death benefit.

Annuities and life insurance are issued by, and product guarantees are solely the responsibility of, Brighthouse Life Insurance Company and, in New York only, by Brighthouse Life Insurance Company of NY ("Brighthouse Financial"). All variable products are distributed by Brighthouse Securities, LLC (member FINRA). All are Brighthouse Financial affiliated companies.
