Avg P/E Ratio (x)**	29.88	30.55	N/A
Avg P/B Ratio (x)	6.98	7.93	N/A
Avg Mkt Cap (\$M)	414,646	456,759	N/A

Benchmark for this fund is Dow Jones Moderate TR. *Source: Wilshire Compass

** The P/E ratio may be impacted by the inclusion of negative or low earnings companies in the calculation methodology used by Wilshire.

About Risk

Prices of equity securities change in response to many factors, including past and prospective earnings of the issuer, the value of its assets, general economic conditions, investor perceptions, and market liquidity. Bond prices may change in response to many factors, including changes to market interest rates, inflation, changes to the credit worthiness of the issuer, liquidity concerns, and investor perception. Investing in moderate allocations does not guarantee a profit or protect against a loss, and moderate funds will not necessarily outperform more aggressive funds in down markets.

Glossary of Terms

Alpha Measures the portion of a fund's return that is unrelated to movements in the benchmark. It is calculated over the most recent 36 months of data.

Beta Measures the degree to which a fund's return is affected by movements in the market, represented by the fund's benchmark index. The market is represented as 1.0, so a fund with a beta of 2.0 means that the fund's price moves twice as much as the market, plus or minus the fund's alpha.

Market Cap Calculated by multiplying the market price per share of a company by the number of shares outstanding. Companies are usually grouped into micro, small, mid and large "caps."

P/B Ratio Price-to-book ratio is calculated by dividing the current share price of a stock by its latest quarter's book value per share. Book value is total assets minus intangible assets and liabilities.

P/E Ratio Price-to-earnings ratio is the valuation of a company's current share price compared to its per-share earnings over the most recent 12-month period.

R-Squared Measures the proportion of a fund's performance that is related to its benchmark index. For example, a large-cap equity fund with an R^2 of 86 that is benchmarked to the S&P 500 Index indicates that 86% of the fund's historical behavior can be attributed to movements in the S&P 500.

Sharpe Ratio The ratio of a fund's excess returns to its standard deviation. Measured over a 36-month period.

Standard Deviation Measures the historical volatility of a fund. Funds with higher standard deviation are generally considered to be riskier.

Disclosures

Investment performance is not guaranteed. Past performance is no guarantee of future results.

This material must be preceded or accompanied by a prospectus for the variable annuity or variable life insurance product issued by Brighthouse Life Insurance Company, New England Life Insurance Company and, in New York only, by Brighthouse Life Insurance Company of NY. The contract prospectus contains information about the contract's features, risks, charges, and expenses. Investors should consider the investment objectives, risks, charges, and expenses of the investment company carefully before investing. The investment objectives, risks, and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Prospectuses and complete details about the contract are available from a financial professional and should be read carefully before investing. Please refer to the contract prospectus for more complete details regarding the living and death benefits.

Variable annuities and variable life insurance products are long-term investments designed for retirement purposes. Variable annuities issued by Brighthouse Life Insurance Company, New England Life Insurance Company and, in New York only, by Brighthouse Life Insurance Company of NY, have limitations, exclusions, charges, termination provisions, and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet their stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value, even when an optional protection benefit rider is elected. All contract and rider guarantees, including optional benefits and annuity payout rates, are subject to the claims-paying ability and financial strength of Brighthouse Financial. Please contact your financial professional for complete details.

The Dow Jones Moderate Portfolio Index is a member of the Dow Jones Relative Risk Index Series and is designed to measure a total portfolio of stocks, bonds, and cash, allocated to represent an investor's desired risk profile. The Dow Jones Moderate Portfolio Index level is set to 60% of the Dow Jones Global Stock CMAC Index's downside risk over the past 36 months. The Dow Jones indices are Source and Copyright © 2021 Dow Jones & Company Inc - All rights therein reserved
