The average annual total returns on the previous page represent past performance and are not an indication of future performance. There is no guarantee that any of the variable investment options in this product will meet its stated goals or objectives. The cash value is subject to market fluctuations so that, when withdrawn, it may be worth more or less than the amount of premiums paid.

Prospectuses for the underlying investment funds are available from New England Life Insurance Company. The prospectuses contain information about the investment objectives, risks and policies of the underlying investment funds, as well as other information about the underlying funding choices. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. All product guarantees are subject to the financial strength and claims-paying ability of the issuing insurance company.

Policy values depend not only on the investment performance of the underlying funds, but also on insurance, sales, premium tax, and administrative charges, which are not reflected in these rates of return, but which significantly reduce the return to the policyholder. The total returns do reflect the fees and expenses of the underlying funds. We urge you to contact your financial professional to obtain a personalized illustration, which reflects the charges and expenses applicable to your polity.

The underlying funds, which generally have the same investment objectives, policies and portfolio managers as the retail funds for which they are named, are separate and distinct from the retail funds. Their performance may be dramatically different from the performance of the retail funds, due to differences in the funds' size, cash flow, expenses and the timing of purchases and sales of securities.

The performance shown may reflect, for some periods described, the management of previous investment managers. Please see the prospectus for more information.

A fee waiver or expense limit may be or have been in place for any of the investment options. The reduced expenses that may result from this waiver or limit may increase performance results. Please see the prospectus for more information.

[1] Total returns for the Invesco Small Cap Growth Portfolio, and the Harris Oakmark International Portfolio reflect the performance of the Class B shares of these Portfolios, as restated to exclude 12b-1 fees, for the period before January 2, 2002.

[2] On April 27, 2001, the MetLife Stock Index Portfolio (which commenced operations on May 1, 1990) was substituted for the Westpeak Stock Index Series of the New England Zenith Fund.
